

HPS[®] Corrugated Steel

High Performance Steel (HPS) is developed for optimal effectiveness in woodworking applications.

- Great results in both hardwood & softwood.
- Easier profiling and re-grinding than high speed steel.
- Markedly tougher, and more resistant to breakage than its counterparts.
- High impact strength.

A special hardening process is what makes this steel less brittle and easier to grind. Available by the bar, and well priced - ask your sales rep today.
